

SIVA MANIKANTA REDDY

Computer Science Student • Developer • AI/ML Enthusiast

Email: tmanikantareddy073@gmail.com | Phone: +91 9949189992 | Location: Vijayawada, Andhra Pradesh

PROFESSIONAL SUMMARY

Proactive and technically grounded Computer Science student pursuing B.Tech in CSM (Artificial Intelligence & Machine Learning) with 88% academic standing, built upon a Diploma in Computer Engineering (87% distinction). Experienced in building responsive web applications, Python utilities, and generative AI workflow architectures. Passionate about solving real-world challenges through clean, maintainable software and practical applied machine learning.

EDUCATION

B.Tech in Computer Science & Engineering (CSM - AI & ML)

88% (Ongoing)

Amrita Sai Institute of Science and Technology • JNTU Kakinada
Year: 2028

Diploma in Computer Engineering (C.M.E)

87% (Distinction)

Usha Rama College of Engineering • State Board of Technical Education
Year: 2025

Secondary School Certificate (SSC)

75%

S V B V N (E.M.) High School, Vijayawada • Board of Secondary Education, AP
Year: 2022

TECHNICAL SKILLS

Programming Languages: Python, Java

Web Development: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, MERN Stack Fundamentals

Databases: SQL (SQLite, Relational Schema Design, Queries)

AI & Emerging Tech: AI/ML Foundations, LLM API Integration (Google Gemini API), Prompt Engineering, Pydantic

KEY PROJECTS

GenUI AI — Generative UI for Dynamic Workflows | [AI / Generative UI / Hackathon](#)

Technologies: Python, FastAPI, React, Tailwind CSS, SQLite, Google Gemini API, Pydantic, Vite

• Engineered an AI-powered system converting natural language prompts into dynamic user interfaces and structured interactive workflows. Validated schema representation via Pydantic and rendered responsive React layouts.

Digital Attendance System | [Full Stack Web Application](#)

Technologies: HTML, CSS, JavaScript, SQL, Web Technologies

• Designed and implemented a digital attendance recording platform to streamline roster tracking, eliminate manual registration errors, and provide structured tabular audit logs.

Expense Master | [Python Prediction Mini Project](#)

Technologies: Python, Numeric Modeling, Data Structures

• Built a financial utility to estimate and project monthly expenditures based on categorical spending inputs, computing fixed vs flexible balance projections.

Password Generator | [Python Security Utility](#)

Technologies: Python, Randomization Logic, String Permutations

• Developed a lightweight security tool that generates high-entropy, customizable passwords using Python primitive data structures and uniform randomness.

EXPERIENCE & INTERNSHIPS

Full Stack Web Development Intern (MERN Stack)

MERN Stack Internship Program • Completed

- Built responsive full-stack applications with React frontends and Node.js/Express REST APIs.
- Structured relational & document models, implemented state management, and deployed interactive components.

AWS Academy Data Engineering Virtual Intern

AWS Academy • Completed

- Explored cloud data pipeline design, distributed storage primitives, and managed cloud infrastructure on AWS.
- Examined foundational ETL principles and scalable cloud architecture design patterns.

CERTIFICATIONS & ACHIEVEMENTS

- NRI-U Hackathon Participation Certificate — NRI Institute of Technology (GenUI AI Project)
- Full Stack Web Development in MERN Stack Internship Certificate
- IBM AI/ML Course Certificate — Foundations of Artificial Intelligence & Machine Learning
- AWS Academy Data Engineering Virtual Internship Certificate
- Infosys Springboard Basics of Python Certificate
- Cisco Networking Academy Introduction to Cybersecurity Certificate
